ELSEVIER

European Journal of Operational Research 114 (1999) 658–660

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 114

1 Decision making using multiple models
M.K. Malhotra, S. Sharma and S.S. Nair

15 Multiple level production planning in rolling horizon assembly environments
N.C. Simpson

29 On the global optimal solution to an integrated inventory system with general time varying demand, production and deterioration rates
Z.T. Balkhi

38 The multi-location inventory centralization problem with first-come, first-served allocation
A. Eynan

50 Balancing assembly lines effectively – A computational comparison
A. Scholl and R. Klein

59 Exploiting process plan flexibility in production scheduling: A multi-objective approach
P. Brandimarte

72 A hierarchical approach for one-dimensional cutting stock problems in the steel industry that maximizes yield and minimizes overgrading
F.J. Vasko, D.D. Newhart and K.L. Stott Jr.

83 A spreadsheet modelling approach to the assortment problem
B.M. Baker

93 Capability indices for material balance accounting
S. Prasad and A. Calis

105 Integer programming to schedule a hierarchical workforce with variable demands
A. Billionnet

115 Portfolio selection based on upper and lower exponential possibility distributions
H. Tanaka and P. Guo

127 Exact solution methods for uncapacitated location problems with convex transportation costs
K. Holmberg

141 Genetic algorithm approach on multi-criteria minimum spanning tree problem
G. Zhou and M. Gen

153 Interval estimation of priorities in the AHP
S. Lipovetsky and A. Tishler

165 Lagrangean/surrogate relaxation for generalized assignment problems
M.G. Narciso and L.A.N. Lorena

178 Technical efficiency and distance to a reverse convex set
W. Briec and B. Lemaire

188 The bilevel linear/linear fractional programming problem
H.I. Calvete and C. Galé

198 The finite criss-cross method for hyperbolic programming
T. Illés, A. Szirmai and T. Terlaky

215 Call for Papers

217 Financial modelling as a bridging feature
J. Spronk

219 Heuristic algorithms for the portfolio selection problem with minimum transaction lots
R. Mansini and M.G. Speranza
234 Using data envelopment analysis for costing bank products
A.C. Soteriou and S.A. Zenios
249 The simulation of option prices with application to LIFFE options on futures
G.A. Christodoulakis and S.E. Satchell
263 Business failure prediction using rough sets
A.I. Dimitras, R. Slowinski, R. Susmaga and C. Zopounidis
281 Evaluating predictive performance of judgemental extrapolations from simulated currency series
A.C. Pollock, A. Macaulay, D. Önkal-Atay and M.E. Wilkie-Thomson
294 Some basic problems in inventory theory: The financial perspective
E. Luciano and L. Peccati
304 Variance vs downside risk: Is there really that much difference?
H. Grootveld and W. Hallerbach
320 Optimal exit and valuation under demand uncertainty: A real options approach
L.H.R. Alvarez
330 Coordination of pricing and multi-period production for constant priced goods
S.M. Gilbert
338 Price subsidies and guaranteed buys of a new technology
S. Jørgensen and G. Zaccour
346 Comparing performance of feedforward neural nets and K-means for cluster-based market segmentation
H. Hruschka and M. Natter
354 Automatic clustering of business processes in business systems planning
H.-S. Lee
363 Location of hubs in a competitive environment
V. Marianov, D. Serra and C. ReVelle
372 Location of an undesirable facility in a polygonal region with forbidden zones
J. Muñoz-Pérez and J.J. Saameño-Rodríguez
380 A geometrical solution for quadratic bicriteria location models
Y. Ohsawa
389 A maxmin policy for bond management
L.L. Ghezzi
395 The cutting stock problem with mixed objectives: Two heuristics based on dynamic programming
J. Antonio, F. Chauvet, C. Chu and J.-M. Proth
403 Complexity of parallel machine scheduling with processing-plus-wait due dates to minimize maximum absolute lateness
T.C.E. Cheng and M.Y. Kovalyov
411 Bounds for the position of the smallest job in completion time variance minimization
D.K. Manna and V.R. Prasad
420 Two-machine flowshop scheduling with availability constraints
C.-Y. Lee
430 An algorithm of global optimization for solving layout problems
E. Feng, Xilu Wang, Xiumei Wang and H. Teng
437 Fast collison detection in four-dimensional space
M.D.S. Aliyu, K.S. Al-Sultan

447 A stochastic and dynamic model for the single-vehicle pick-up and delivery problem
M.R. Swihart and J.D. Papastavrou
465 Optimizing dead mileage in urban bus routes through a nondominated solution approach
S. Prakash, B.V. Balaji and D. Tuteja
474 An application of neurofuzzy modeling: The vehicle assignment problem
K. Vukadinović D. Teodorović and G. Pavković
489 Submodularity and the traveling salesman problem
Y.T. Herer

509 Weight distribution considerations in container loading
A.P. Davies and E.E. Bischoff
528 An exact algorithm for large multiple knapsack problems
D. Pisinger
542 An application of simulated annealing to the cutting stock problem
L. Faina
557 A sequential heuristic procedure for one-dimensional cutting
M. Gradišar, M. Kljajić, G. Resinovič and J. Jesenko
569 An algorithm to perform a complete right-hand-side parametrical analysis for a 0–1-integer linear programming problem
A. Crema
580 Interactive fuzzy programming for multi-level 0–1 programming problems through genetic algorithms
M. Sakawa, I. Nishizaki and M. Hitaka
589 Optimization of neural networks: A comparative analysis of the genetic algorithm and simulated annealing
R.S. Sexton, R.E. Dorsey and J.D. Johnson
602 The sensitivity analysis of binary networks via simulation
N.-H. Shih
610 A new analytical algorithm and generation of Gaussian quadrature formula for stochastic network
S.M.T. Fatemi Ghomi and S.S. Hashemin
626 Cognitive maps and fuzzy implications
T. Marchant
638 CORO, a modeling and an algorithmic framework for oil supply, transformation and distribution optimization under uncertainty
L.F. Escudero, F.J. Quintana and J. Salmerón
657 Book Review
H. Fleuren (Ed.)
658 Contents Volume 114
